EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

In The Claims:

Cancel claims 15-25, which were nonelected without traverse.

4. The following is an examiner's statement of reasons for allowance:

Claims 1, 3-14 and 26-35 are allowed because the prior art of record fails to teach the claimed methods of drying circuit board materials and manufacturing circuit boards, particularly the steps of evacuating and supplying air more than once wherein the predefined pressure of a subsequent evacuating step is lower than the predefined pressure of the previous evacuating step.

JP U 61-55372 teaches drying printed circuit boards using an evacuating step and an air supplying step but does not appear to teach perform the steps multiple times.

Chapman et al discloses a method for drying integrated circuit boards wherein the boards are placed in a vacuum chamber, warm dry heated air at ambient pressure is blown into the chamber to heat the boards, the vacuum chamber is evacuated to a predetermined pressure and the heating (air supplying) and evacuating steps are applied in alternating cycles (Column 2, lines 7-62). There is no suggestion that the pressure of each subsequent evacuation step is decreased.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
